

Share Your Survivor Photo or Tribute Photo of a Loved One Lost

Would you like to have your photo featured on our Survivor or Tribute slideshow? You can choose to share photos two ways, via email and via Flickr.

1) Via Email

Submitting a photo to the group is as easy as sending an email. Really! All you have to do is email your photo to Race@pskomen.org. In the email subject line, write the title of your photo. In the body of the email, say the photo is for Flickr and write the description of your photo, your first and (optional) last name. Let us know if you want it to be added specifically to the following albums:

- Breast Cancer Survivor Album
- Breast Cancer Tribute Album
- Race for the Cure Puget Sound

When you hit "Send" the photo will be added to the Komen Puget Sound Flickr page and the "Susan G. Komen for the Cure Puget Sound" group photo pool.

2) Directly to Flickr

You can follow these simple steps to post photos to the "Susan G. Komen for the Cure Puget Sound" group:

1. Sign up for a free Flickr account <http://www.flickr.com> then join our "Susan G. Komen for the Cure Puget Sound" group.
2. Upload your photo to Flickr. Under privacy options, choose "public," and put in the following tag, "Race for the Cure Puget Sound." Remember to add a sentence explaining what the photo shows, along with your first and (optional) last name, city and country.
3. Click on the Flickr photo you'd like to submit. Open the "Send to Group" icon above the photo and you should see a list of groups you belong to. Select "Susan G. Komen for the Cure Puget Sound." A message will appear that your photo has been added. Click "ok."
4. Joining Flickr assures you'll be able to see all of the photos posted to this group, as the photos of new members are only visible to other logged-in members.

Please Note:

**"Susan G. Komen for the Cure Puget Sound" has the right to remove any photo deemed inappropriate.*

**By uploading your photo to our Flickr account you give us permission to use and distribute your photo.*
